CE

## Surgical Tapes

For all types of dressing fixations, for securing probes, cannulas, catheters or measuring instruments in patients with sensitive skin. Ensure that the skin is dry and clean before application.

### Omniplast®

Made of skin-coloured textile fabric, with synthetic rubber adhesive in stripes; particularly tensile and hard-wearing, water repellent impregnated, with zig-zag edges.

### Omnisilk®

Made of white synthetic silk, with synthetic rubber adhesive in stripes; water repellent impregnated, very permeable to air, with zig-zag edges.

### Omnipor®

Made of white non-woven fabric, with synthetic rubber adhesive in stripes; water repellent impregnated; it is extremely high permeable to air and water vapour, thus preventing skin maceration; especially suitable for long-term dressings and in patients with hypersensitive skin.

### Omnifilm®

Made of porous, transparent film with polyacrylate adhesive; dirt-repellent; can be torn easily lengthwise and widthwise; especially suitable for transparent securing of cannulas or tubes to make it possible to check fluid levels.

Available on plastic spools with 9,2m length - width 1,25 - 2,5 - 5 cm

**Injection Plaster**

DermaPlast® sensitive injection plaster made of a soft, highly elastic non-woven fabric, highly permeable to air and water vapour; for the treatment of the puncture point after injections in patients with very sensitive skin.

Size 1.6 cm x 4 cm - box with 250 pcs.

**RAMCO Art.No. 12115**

**Wound Closure strips**

Adhesive wound closure strip made of non-woven flexible fabric. For the atraumatic closure of minor wounds and surgical incisions in primary healing wounds; also to protect the wound margins against tension and to stabilize fresh scars.

Art.No	Description	Pcs/box
